

The treatment for infertility is not always covered by your insurance policy. Please contact your insurance carrier to verify whether you have coverage. There may be precertification or notification needed for coverage. If precertification is needed, you will need to notify our office before you come in for your appointment.

Each cycle of services will need to be paid in full prior to the start of your next cycle. Should you become pregnant, your balance will need to be paid in full prior to your first prenatal appointment.
